Applicant's election without traverse of the invention of claims 1-37 in Paper No. 7 is acknowledged.

Further restriction between the inventions of claims 1-37 is required as follows.

This application contains claims directed to the following patentably distinct species of the claimed invention: the first species wherein the conditions comprise using a fluorine containing material over the metal film during the oxidizing to obtain the function recited in claim 1, last two lines, the second species wherein the conditions comprise using a fluorine containing composition in gaseous form to obtain the function recited in claim 1, last two lines, the third species comprising thermally processing a metal structure in a gaseous fluorine containing composition to obtain the function recited in claim 9, last two lines and the fourth species comprising thermally processing a metal structure in the presence of a solid fluorine containing composition to obtain the function recited in claim 9, last two lines.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1,27,36 and 37 are generic to species 1 and 2 and claims 9,10,14,17 and 18 are generic to species 3 and 4.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Claims 7 and 34 link(s) inventions 1 and 2. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 7. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
